

Frontend Developer Internship – Task 2

Calculator Web Application

Name: Abhishek Kushwaha

Role: Frontend Developer Intern

Company: Alfido Tech

Objective

Develop a responsive calculator using HTML, CSS, and JavaScript to perform basic arithmetic operations.

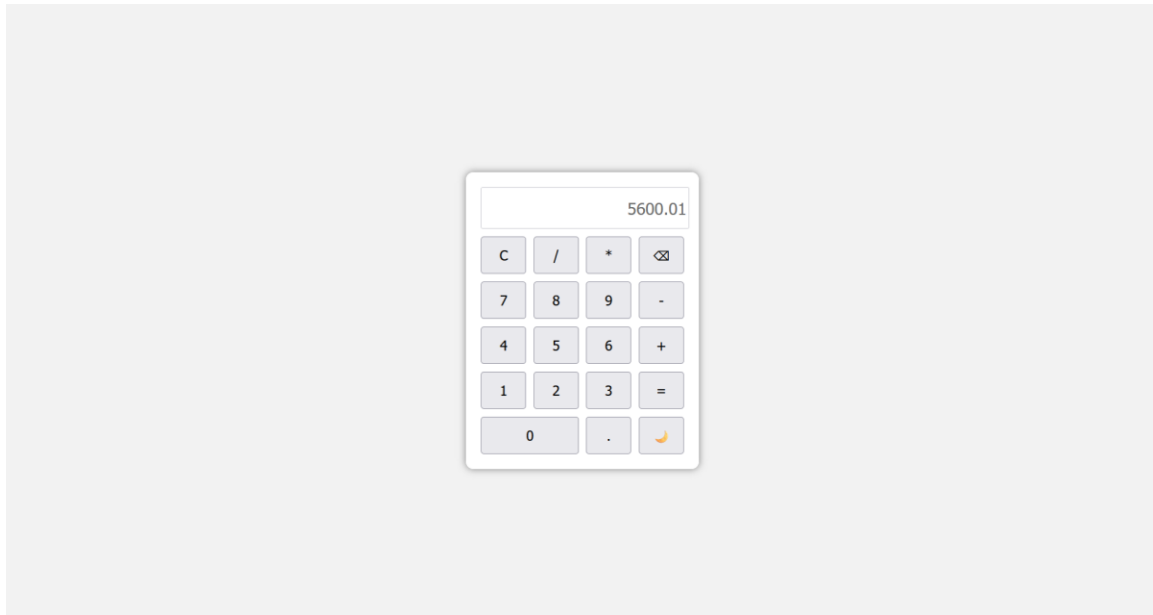

Technologies Used

- HTML5
- CSS3
- JavaScript

Features

- Addition
- Subtraction
- Multiplication
- Division
- Responsive design
- Clear button
- Decimal support

Project Screenshot

Code Snippet

```
const display = document.getElementById("display");
```

```
function appendValue(value) {  
    display.value += value;  
}
```

```
function clearDisplay() {  
    display.value = "";  
}
```

```
function deleteLast() {  
    display.value = display.value.slice(0, -1);  
}
```

```
function calculate() {
```

```
try {  
    display.value = eval(display.value);  
} catch {  
    display.value = "Error";  
}  
}
```

GitHub Repository

<https://github.com/abhishekkushwaha0725-netizen/JavaScript-Mini-Project--Calculator>

Live Demo

<https://abhishekkushwaha0725-netizen.github.io/JavaScript-Mini-Project--Calculator/>

Output

The calculator performs arithmetic operations accurately and is fully responsive.
